

GENE TESTED PAPILLONS & PHALENES

Updated 31.03.2026

PRA: *CORD1*, *CNGB1* / *PAP_PRA1*

NAD: *neuroaxonal dystrophy*

vWD: *Von Willebrand disease type 1*

Please notice that this document contains FOUR different gene test results *CORD1*, *CNGB1* / *PAP_PRA1*, NAD and Von Willebrand Disease I. If the "box" is white and empty (no text), it means that *DOG* hasn't been tested.

PRA I. progressive retinal atrophy (autosomal recessive inheritance). Gene test (*Cord1*, *PAP_PRA1* / *CNGB1*) results.

N/N = normaali Koira ei kannata perimässään *CORD1* tai *PAP_PRA1* / *CNGB1* mutaatiota, jotka aiheuttavat PRA:ta.

N/N = clear / normal Dog does not carry the causative mutation for *CORD1* or *PAP_PRA1* / *CNGB1*.

N/N = normal Hund har inte ärvt defektanlaget från någon av sina föräldrar, *CORD1* eller *PAP_PRA1* / *CNGB1*.

kantaja (N/PRA) Koira kantaa perimässään yhtä *CORD1* tai *PAP_PRA1* / *CNGB1* mutaatiota, joka aiheuttaa PRA:ta. Koira ei itse sairastu, mutta siirtää mutaation jälkeläisilleen.

carrier (N/PRA) This dog carries ONE copy of the *CORD1* or *PAP_PRA1* / *CNGB1* mutation. They will not develop the form of PRA due to the mutation but they CAN pass the mutation on to their offspring.

anlagsbärare (N/PRA) En anlagsbärande hund har ärvt anlaget från ena föräldern och riskerar därmed att föra detta vidare till sina eventuella avkommor.

altis (PRA/PRA) Koiralla on kaksi kopiota geenimutaatiosta *CORD1* tai *PAP_PRA1* / *CNGB1*.
Koiralla on riski sairastua PRA:han.

affected (PRA/PRA) Dog has two copies of the causative mutation for *CORD1* or *PAP_PRA1* / *CNGB1*. It can be expected that they will develop PRA in their lifetime.

affekterad (PRA/PRA) Hund har ärvt den defekta genvarianten (*CORD1* eller *PAP_PRA1* / *CNGB1*) från båda sina föräldrar och kan förväntas utveckla PRA någon gång under sin livstid.

NAD 1. neuroaxonal dystrophy (autosomal recessive inheritance). Gene test results. In PLA2G6-gene.	
<i>N/N = normaali</i>	Koira ei kannaa perimässään NAD mutaatiota, joka aiheuttaa sairauden.
<i>N/N = clear / normal</i>	Dog does not carry the causative mutation for NAD, which causes this disease. The examined animal is homozygous for the wildtype-allele. It does not carry the causative mutation for NAD in the PLA2G6-gene.
<i>N/N = normal</i>	Hund har inte ärvt defektanlaget från någon av sina föräldrar, NAD.
<i>kantaja (N/NAD)</i>	Koira kantaa perimässään yhtä NAD mutaatiota, joka aiheuttaa sairauden. Koira ei itse sairastu, mutta siirtää mutaation jälkeläisilleen.
<i>carrier (N/NAD)</i>	This dog carries ONE copy of the NAD mutation. They will not develop symptoms due to the mutation but they CAN pass the mutation on to their offspring.
<i>anlagsbärare (N/NAD)</i>	En anlagsbärande hund har ärvt anlaget från ena föräldern och riskerar därmed att föra detta vidare till sina eventuella avkommor.
<i>altis (NAD/NAD)</i>	Koiralla on kaksi kopiota geenimutaatiosta NAD. Koira sairastuu.
<i>affected (NAD/NAD)</i>	Dog has two copies of the mutant NAD gene that causes the condition and will develop the disease.
<i>affekterad (NAD/NAD)</i>	Hund har ärvt den defekta genvarianten (NAD) från båda sina föräldrar och kan förväntas utveckla symptom.

von Willebrand disease 1 (vWD1) (autosomal recessive inheritance). Gene test results.	
N /N= normaali	Koira ei kannaa perimässään vWDI mutaatiota, joka aiheuttaa von Willebrandin tauti tyyppi 1:n.
N/N = clear / normal	Dog does not carry the causative mutation for von Willebrand disease type 1.
N/N = normal	Hund har inte ärvt defektanlaget från någon av sina föräldrar von Willebrand sjukdom.
<i>kantaja (N/VWDI)</i>	Koira kantaa perimässään yhtä mutaatiota, joka aiheuttaa von Willebrand taudin 1 . Koira ei itse sairastu, mutta siirtää mutaation jälkeläisilleen.
<i>carrier (N/VWDI)</i>	This dog carries ONE copy of the mutation. They will not develop the von Willebrand disease 1 but they CAN pass the mutation on to their offspring.
<i>anlagsbärare (N/VWDI)</i>	En anlagsbärande hund har ärvt anlaget från ena föräldern och riskerar därmed att föra detta vidare till sina eventuella avkommor.
<i>altis (VWDI/VWDI)</i>	Koiralla on kaksi kopiota geenimutaatiosta, joka aiheuttaa von Willebrandin taudin ja sairaus tulee ilmi jossain vaiheessa.
<i>affected (VWDI/VWDI)</i>	Dog has two copies of the causative mutation. It can be expected that they will develop symptoms of von Willebrand disease type 1.
<i>affekterad (VWDI/VWDI)</i>	Hund har ärvt den defekta genvarianten från båda sina föräldrar och kan förväntas utveckla von Willebrandin sjukdom någon gång under sin livstid.
